

ABSTRACT OF THE DISCLOSURE

An internet-based system for recruiting candidates for employment is provided. A server is configured to receive employment requisitions having candidate matching criteria, host an interactive interface for presenting a candidates for employment with an employment skills questionnaire, assess each candidate based on a comparison between each candidate's employment skills and the candidate matching criteria and host an interactive interface for allocating invitations to an employer-hosted recruiting event to candidates based on the assessment. The server may also be configured to host an interface for defining, scheduling and receiving candidate assessments in real time during the employer-hosted recruiting events. Candidates are selected for hire in real time during the recruiting events and receive an offer/no offer letter electronically prior to the conclusion of their respective event.
